

Vulnerable Persons Guide

Emergency Preparedness Gibraltar · HM Government of Gibraltar · prepare.gov.gi

This guide is for vulnerable individuals, their families, carers, and neighbours. Planning ahead — before an emergency — significantly reduces risk. **In a life-threatening emergency, always call 999 immediately.**

PERSONS WITH DISABILITIES

- ▶ Include disability-specific needs in your household emergency plan — evacuation routes, communication needs, equipment.
- ▶ If you use a wheelchair or have limited mobility, identify accessible evacuation routes and speak to your building manager about a Personal Emergency Evacuation Plan (PEEP).
- ▶ Ensure your support network knows your needs and how to help.
- ▶ Keep mobility aids, communication devices and medical equipment accessible at all times.
- ▶ Register your needs with the services listed at the foot of this page.
- ▶ Let trusted neighbours know about your needs so they can check on you.

ELDERLY RESIDENTS

- ▶ Have at least two people outside your household who know your contact details and can check on you.
- ▶ If you live alone, consider sharing a key with a trusted neighbour.
- ▶ Register with the Gibraltar Electricity Authority's priority register if you rely on electrically powered medical equipment.
- ▶ Keep a list of medications and medical conditions accessible for emergency responders.
- ▶ Prepare a grab bag with medications, warm clothing and important documents.
- ▶ Neighbours and family: check on elderly residents during heatwaves, storms and power cuts.

CHILDREN

- ▶ Teach children their full name, address and a parent or guardian's phone number.
- ▶ Practise your household fire escape plan with children regularly.
- ▶ Agree on a meeting point children can go to if they cannot reach home.
- ▶ Ensure schools have up-to-date emergency contact information.
- ▶ Talk calmly about emergencies in an age-appropriate way — prepared children are less frightened.
- ▶ Include children's needs (comfort items, snacks, medications) in your grab bag.

CARERS

- ▶ Make sure your emergency plan covers what happens if you are unavailable during an emergency.
- ▶ Identify a backup carer who can step in at short notice.
- ▶ Keep a written record of the person's care needs, medications and contacts where others can find it.
- ▶ Ensure care services have an emergency contact plan in place.
- ▶ Involve the person you care for in making the emergency plan.
- ▶ Carry a summary of care needs in case emergency services need to assist.

POWER CUTS & MEDICAL EQUIPMENT

- ▶ If you rely on electrically powered equipment — ventilator, oxygen concentrator, electric wheelchair — a power cut can become a medical emergency.
- ▶ Register with the Gibraltar Electricity Authority for priority reconnection (see below).
- ▶ To report a power cut, call 200 75957 at any hour, or the direct fault line on 58466000 out of office hours.
- ▶ Speak to your GP or GHA specialist about backup options during a power cut.
- ▶ Keep devices charged and consider a battery backup (UPS) for critical equipment.
- ▶ Know in advance who to call if equipment fails — supplier, GHA, or 999 if a medical emergency.

NON-ENGLISH SPEAKERS

- ▶ GBC Radio (91.3 FM / 1458 AM) broadcasts official emergency information in English.
- ▶ HM Government of Gibraltar may issue updates in Spanish during major incidents.
- ▶ Ask neighbours or community organisations for help translating official information.
